
TF Medical Packaging Machine

VARI-PAC_{UK}

The need to automatically pack with speed and precision items such as disposable-syringes, needles, surgical kits, catheters, infusion sets, gauze, speculums, deodorants, baby articles, can be met by the TM-620. The machines are designed to work in clean rooms. It is possible to form trays with rigid or soft film, sealed with medical paper - Tyvek -carton boards or plastic films.

- Suitable for installation in clean room
 - Designed to work with every type of film with thickness between 90 and 900 micron
 - As sealing film we can use plastic film, medical paper, Tyvek or aluminium
 - Control stations for formed trays
 - The brushless motor helps to guarantee the perfect print positioning on each pack, also with paper or Tyvek
-
